

Data from Incyte's Inflammation and Autoimmunity Portfolio to be Featured at the 24th World Congress of Dermatology

May 20, 2019

Investor conference call and webcast scheduled for Monday, June 17 at 8 a.m. EDT

WILMINGTON, Del.--(BUSINESS WIRE)--May 20, 2019-- Incyte Corporation (Nasdaq:INCY) announces that data from key studies within its inflammation and autoimmunity portfolio will be presented at the 24th World Congress of Dermatology (WCD). This meeting will be held in Milan, Italy from June 10-15, 2019.

Presentations will feature 24-week data from a Phase 2 study of ruxolitinib cream in adult patients with vitiligo, which will be highlighted during the late-breaking research session, and 12-week data from a Phase 2 study of ruxolitinib cream in adult patients with atopic dermatitis.

"We look forward to sharing initial results from our Phase 2 study of ruxolitinib cream in vitiligo and additional data from our Phase 2 trial in atopic dermatitis – two conditions for which many patients need novel and effective treatment options," said Steven Stein, M.D., Chief Medical Officer, Incyte. "Incyte is committed to developing therapies to address key unmet medical needs, and data to be presented at WCD demonstrate exciting progress in the development of ruxolitinib cream, our most advanced inflammation and autoimmunity program."

Oral Presentations
