

Incyte Targeted Therapy and Immuno-Oncology Portfolio to be Featured in 15 Abstracts at the AACR Annual Meeting 2018

March 15, 2018

WILMINGTON, Del.--(BUSINESS WIRE)--Mar. 15, 2018-- Incyte Corporation (Nasdaq:INCY) announces that 15 abstracts from its research and development portfolio will be presented at the upcoming 2018 American Association for Cancer Research (AACR) annual meeting in Chicago, Illinois from April 14-18, 2018. These abstracts include the first pre-clinical data from the Company's recently announced AXL/MER, TIM-3 and LAG-3 antibody programs in patients with advanced solid tumors.

"We are excited to present a broad collection of abstracts from our robust development portfolio at this year's AACR Annual Meeting," said Reid Huber, Ph.D., Incyte's Chief Scientific Officer. "The acceptance of these abstracts and their results represent the progress Incyte continues to make in the pursuit of R&D excellence and ultimately innovation in the treatment of cancer and other serious diseases."

Key abstracts include:

Immuno-Therapy

Combination of a T Cell Activating Immunotherapy with Immune Modulators Alters the Tumor Microenvironment and Promotes More Effective Tumor Control in Preclinical Models (Abstract #1761, Immunology – Modifiers of the Tumor Microenvironment 2)

- Monday, April 16, 2018, 8:00 a.m. – 12:00 p.m. CDT, Chicago, Poster Section 33

Identification of p-AKT as a PD marker for MER Kinase in Human G361 Cells (Abstract #2367, Molecular and Cellular Biology/Genetics – Kinases and Phosphatases)

- Monday, April 16, 2018, 1:00 p.m. – 5:00 p.m. CDT, Chicago, Poster Section 17

Characterization of INCB081776, a Potent and Selective Dual AXL/MER Kinase Inhibitor (Abstract #3759, Immunology – Immunomodulatory Agents and Interventions 1)

- Tuesday, April 17, 2018, 8:00 a.m. – 12:00 p.m. CDT, Chicago, Poster Section 32

INCAGN02390, a Novel Antagonist Antibody that Targets the Co-Inhibitory Receptor TIM-3 (Abstract #3825, Immunology – Therapeutic Antibodies, Including Engineered Antibodies 3)

- Tuesday, April 17, 2018, 8:00 a.m. – 12:00 p.m. CDT, Chicago, Poster Section 34

INCAGN02385 is an Antagonist Antibody Targeting the Co-Inhibitory Receptor LAG-3 for the Treatment of Human Malignancies (Abstract #3819, Immunology – Therapeutic Antibodies, Including Engineered Antibodies 3)

- Tuesday, April 17, 2018, 8:00 a.m. – 12:00 p.m. CDT, Chicago, Poster Section 34

Epacadostat plus Durvalumab in Patients with Advanced Solid Tumors: Preliminary Results of the Ongoing, Open-Label, Phase 1/2 ECHO-203 Study (Abstract #CT177, Session CTMS03 – Biomarkers in Immuno-Oncology [minisymposium])

- Tuesday, April 17, 2018, 2:45 p.m. – 5:00 p.m. CDT, Chicago, N Hall C – McCormick Place North (Level 1)

Targeted Therapy

INCB052793, a JAK1 Selective Inhibitor, is Highly Efficacious in PDX and Xenograft Models of Acute Myeloid Leukemia (AML) Expressing Elevated Endogenous pSTAT3/pSTAT5 (Abstract #1867, Experimental and Molecular Therapeutics – Experimental Agents and Combinations for Hematologic Malignancies 2)

- Monday, April 16, 2018, 8:00 a.m. – 12:00 p.m. CDT, Chicago, Poster Section 38

The Evaluation of INCB059872, an FAD-directed Inhibitor of LSD1, in Preclinical Models of T-ALL (Abstract #1893, Experimental and Molecular Therapeutics – Experimental Agents and Combinations for Hematologic Malignancies 2)

- Monday, April 16, 2018, 8:00 a.m. – 12:00 p.m. CDT, Chicago, Poster Section 38

The FAD-directed LSD1 Specific Inhibitor, INCB059872, is a Promising Epigenetic Agent for AML Therapy by Inducing Differentiation of Leukemic Stem/Progenitor Cells (Abstract #1888, Experimental and Molecular Therapeutics – Experimental Agents and Combinations for Hematologic Malignancies 2)

- Monday, April 16, 2018, 8:00 a.m. – 12:00 p.m. CDT, Chicago, Poster Section 38

INCB059872, a Novel FAD-directed LSD1 Inhibitor, is Active in Prostate Cancer Models and Impacts Prostate Cancer Stem-like Cells (Abstract #1379, Molecular and Cellular Biology/Genetics – Epigenetic Therapy)

- Monday, April 16, 2018, 8:00 a.m. – 12:00 p.m. CDT, Chicago, Poster Section 16

In Vivo Assessment of the Combination of the JAK1-Selective Inhibitor Itacitinib with First- and Second-Generation EGFR Inhibitors in Models of Non-Small Cell Lung Cancer (Abstract #2938, Experimental and Molecular Therapeutics – Novel Experimental Combinations)

- Monday, April 16, 2018, 1:00 p.m. – 5:00 p.m. CDT, Chicago, Poster Section 41

The FAD-Directed LSD1 Specific Inhibitor, INCB059872, Inhibits Cell Migration and Metastasis by Suppressing Premetastatic Niche Formation in a Spontaneous Metastasis Mouse Model (Abstract #3929, Experimental and Molecular Therapeutics – Resistance and Biology)

- Tuesday, April 17, 2018, 8:00 a.m. – 12:00 p.m. CDT, Chicago, Poster Section 39

The BET Inhibitor INCB057643 Suppresses ALDH Activity by Targeting the ALDH1A1 Super-Enhancer in High-Grade Serous Ovarian Cancer (Abstract #3685, Clinical Research – Molecular Classification of Tumors 1: Epigenetic Therapy, Functional and Molecular Imaging, and Tumor Heterogeneity)

- Tuesday, April 17, 2018, 8:00 a.m. – 12:00 p.m. CDT, Chicago, Poster Section 28

Effect of JAK/STAT or PI3Kδ Plus PD-1 Inhibition on the Tumor Microenvironment: Biomarker Results From a Phase 1b Study in Patients with Advanced Solid Tumors (Abstract #CT176, Session CTMS03 – Biomarkers in Immuno-oncology [minisymposium])

- Tuesday, April 17, 2018, 2:45 p.m. – 5:00 p.m. CDT, Chicago, N Hall C – McCormick Place North (Level 1)

Anti-Tumor Efficacy of INCB057643, a Novel BET Bromodomain Inhibitor, in Castration-Resistant Prostate Cancer as Single Agent and in Combination Therapy (Abstract #5793, Experimental and Molecular Therapeutics – Canonical Targets 2)

- Wednesday, April 18, 2018, 8:00 a.m. – 12:00 p.m. CDT, Chicago, Poster Section 36

Forward-Looking Statements

Except for the historical information set forth herein, the matters set forth in this press release, including statements regarding the Company's development pipeline and its presentation plans for the upcoming AACR annual meeting, contain predictions, estimates and other forward-looking statements. These forward-looking statements are based on the Company's current expectations and subject to risks and uncertainties that may cause actual results to differ materially, including unanticipated developments and the risks related to the efficacy or safety of the Company's development pipeline, the results of further research and development, the high degree of risk and uncertainty associated with drug development, clinical trials and regulatory approval processes, other market or economic factors and competitive and technological advances; and other risks detailed from time to time in the Company's reports filed with the Securities and Exchange Commission, including its Form 10-K for the year ended December 31, 2017. Incyte disclaims any intent or obligation to update these forward-looking statements.
